| Date of Birth: 22/07/2004

Objective

Junior Mobile Developer specialized in cross-platform development using Flutter, Dart, Firebase, and API integration. Strong foundation in **C++** and performance optimization, enabling the creation of scalable, high-performance applications. Currently pursuing a Computer Science degree, continuously enhancing my skills to stay ahead in mobile development.

Education

Faculty of Computer Science

Department: Computer Science

Graduation Year: 2026

Experience

Mobile App Development (with Flutter) National Telecommunications Institute with Grade 95% (90 hours technical, 30 hours Soft skills)

- Learned **Dart programming** fundamentals, object-oriented concepts, and **Flutter framework** setup.
- Designed and developed 10+ mobile applications, including E-commerce, Quran, and chat apps.
- Integrated **APIs** for authentication and database management.
- Built a strong foundation in **Flutter** SDK, enabling independent app development.
- Implemented **MVVM architecture** and **Cubit state management** to enhance code maintainability and scalability.

Projects

Social Media App

A feature-rich social media platform inspired by **Facebook and Twitter**, designed for seamless user engagement, interactive posts, and real-time communication.

Technologies Used: Flutter, Git/GitHub, REST APIs

Project Link: [GitHub](#)

Twoaxis Finance App (on Google Play)

A financial management application focuses on expense tracking, budgeting, and smart financial planning.

Role: Contributor

Technologies Used: Flutter, Firebase, Git/GitHub

Project Links: [GitHub](#), [Google Play](#)

Pray To Your Lord (ادْعُ رَبَّكَ)

A Flutter-powered Islamic companion app designed to support and enhance the daily spiritual practices of Muslims worldwide. Features Quran integration, accurate prayer times, a Qiblah compass, a digital Masbaha, full Arabic and English language support, and uses geolocator API for accurate prayer times & Qiblah detection.

Technologies Used: Flutter, Dart, REST APIs, geolocator

Achievements

- Developed 3+ full-featured apps and contributed 210+ times on GitHub within the last year

Technical Skills

- **Mobile Development:** Flutter, Dart, Firebase, State Management (Cubit), MVVM
- **Programming Languages:** Dart, C++
- **API Development & Integration:** RESTful APIs, JSON, Postman
- **Testing & Debugging: Performed** testing and debugging across multiple Flutter projects to ensure quality and performance.
- **Version Control:** Git, GitHub
- **UI/UX: Implemented** responsive design principles to ensure seamless experiences across various device sizes.
- **CI/CD: Implemented** continuous integration using GitHub Actions to automate testing and builds in Flutter projects.

Soft Skills

- Strong problem-solving abilities
- Team collaboration and communication
- Adaptability & Time Management
- Self-learning & Research

Languages

- **English:** Intermediate (Continuously improving)
- **Arabic:** Native

Additional Information

- Open to freelance and remote opportunities
- Actively contributing to open-source projects
- Passionate about learning the latest in Flutter and mobile development
